

## ***Field trips***

Field trips are held each month. On these organized walks and hikes we discover and appreciate the birds, wild flowers, trees, mushrooms, insects, geology, marine life, etc. of our region.

The degree of difficulty on the outings will be indicated on the program—easy, moderate or difficult.

We car-pool whenever possible with passengers sharing the gas on longer trips.

Field trip schedules are included in the overall program outline and are available on line and at the regular meetings.

**Any questions regarding club activities should be directed to the president.**

## ***GENERAL INFORMATION***

Indoor meetings are held on the 2nd Thursday of each month at 7:00 pm at the Nanoose Library, except December (Christmas party), July and August (Picnic).

A variety of natural history topics are presented. A short business meeting is held to bring members current information and to share sightings

.

The Club conducts the annual Christmas Bird Count, takes part in various surveys, participates in various environmental activities and promotes the concept of stewardship of natural resources

As a member, you are also a member of the FBCN and will receive the BC Naturalist magazine 4 times a year.
